loweii - the holistic solution of autonomous measurement technology and an expert system for monitoring and energy optimization of direct current systems

Expert system Miraculum

loweii loweii- Only those who have an overview of everything know where energy flows and can optimize it

VLD1M
Monitoring of HVL or SDS. Without auxiliary voltage you can monitor these fuses for more than 5 years

VLD-versions
As individual as your infrastructure, WITT manufactures your VLD

EscS - SBE
Special VLD for monitoring and protection of objects e.g. bridges which are used by direct and alternating current railways

WB-ISO Point detection of potentials and currents

EscS 7
Classic VLD for monitoring potentials according to DIN EN 50122 and DIN EN 50526 up to class 4

WTC Mobile measurement and documentation of a wide range of measurement tasks and testing of measurement systems, e.g. VLD and cable monitoring

WB-VDC / Ah monitoring and qualification of voltages up to 3,000 VDC and currents up to 80,000 Ah

WB-CM
Monitoring of energy as well as return and cables determination of fault position

SMART loweii – change the DC world with us

How you can save energy with loweii

Loweii uses WITT-Bridge products for direct current monitoring, which are basically equipped with energy-saving technologies. Thanks to the holistic monitoring of your system, you know exactly where energy is flowing, where it may escape unintentionally or where it can damage your infrastructure in the form of stray currents.

Why this holistic solution is unique

There are many earth short-circuiters, cable monitoring systems or systems for determining currents on the market. WITT Solutions GmbH goes one step further. Our WITT Bridge products communicate with each other. The collected data can be analyzed, evaluated and validated with the help of the mirraculum expert system. In this way, you always get a holistic picture of your DC infrastructure, which allows you to react more purposefully, flexibly and sustainably to challenges that arise.

Last but not least

Did you know that 46% of all employees at WITT Solutions GmbH are female?

You will find out in the next newsletter:

How loweii can support you with your predictive maintenance concept.
